Announcing the 2017 Summer Student Research Program

Developed and Sponsored By:
The U54 Center for Cancer Systems Biology

Dates: June 15-July 28

Cancer systems biology focuses on using systems biology approaches, including computational and mathematical modeling, to study cancer as a complex biological system at multiple scales

Objective: To give students a practical experience in cancer systems biology research

- Undergraduate Summer program held at UT Health San Antonio
- Mentored Hands-on research experience in a cancer laboratory
- Participation in ongoing research projects
- Enhanced experience through workshops and interactions with graduate students
- Stipend $3000

Applicants: For more information contact Dr. Nameer Kirma at kirma@uthscsa.edu. Send a 100-word description of your research interests, future goals and how this program will benefit you to achieve these goals to kirma@uthscsa.edu. Email header: U54 summer program

Application Deadline: May 5, 2017
